

# Enabling Innovation through Information Communication Technologies

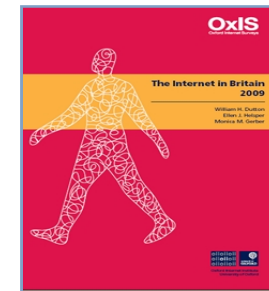

Oxford's capability to innovate through Information Communication Technology is widespread across all areas of the University. Cutting edge research is taking place in the Oxford Internet Institute, Computer Laboratory (COMLAB), the Institute of Biomedical Engineering (IBME) and the Functional Magnetic Resonance Imaging Centre (FMRIB). These are just a few of the many areas of research expertise using ICT. If you are interested to know more on any of these areas or any others not mentioned please contact OUC.
